

Become a YUDU Sentinel Spaces Partner

Deliver uninterrupted incident communications for every client – and unlock a new recurring revenue stream.

Sentinel Spaces is an advanced application for MSSPs to ensure secure out-of-band communication is maintained throughout a cyber attack or IT outage, delivering faster resolution and a lower incident cost for clients.

WHY SPACES FOR MSSPs

Uninterrupted
Incident Support

Add a Recurring
Revenue Line

Stickier Client

Experience

HOW IT WORKS FOR PARTNERS

As a Sentinel Spaces Partner, you'll receive your own Sentinel system and purchase blocks of Client Spaces – starting from a minimum of 5 – which you resell on an annual license to your clients with typical margins of 40% to 70%.

Each Client Space is a dedicated, ring-fenced environment that guarantees secure communications and controlled access to critical documentation between you and your client.

With Sentinel Spaces, you deliver a trusted, always-available crisis coordination hub that enhances your service offering and strengthens client loyalty.

Within every Space, your clients benefit from:

Secure Chat – real-time, encrypted messaging

Video Conferencing – direct face-to-face collaboration

Interactive Whiteboarding – visual planning and problem solving

Mass Notifications – via SMS, email, and in-app alerts

Secure File Sharing – DRM-protected documents and recovery assets
